PROFESSIONAL SUMMARY

Aspiring Software Developer | CS Student

Skilled in Java, C++, Python, and Flutter/Dart for mobile development. IBM-certified in Generative AI (LLM fine-tuning, transformers). Strong problem-solver with experience building responsive UIs. Passionate about delivering innovative solutions in dynamic tech environments.

PROJECTS

folder cleaner, Algorithms Design and Analysis

- The goal of this project is to efficiently detect and delete duplicate files within a folder structure by implementing a specialized algorithm. The solution is then analyzed and optimized for improved speed and performance.

Tic Tac Toe, (python)

- Developed a GUI-based Tic-Tac-Toe game with single-player (two difficulty levels) and two-player modes. Built a basic AI for move generation and implemented robust game logic and input validation. Strengthened skills in Python, event-driven programming, and UI design using Tkinter.

EDUCATION

Bachelor in Computer Science

Qassim University, qassim, Expected graduation Jun 2026

GPA: 4.34

SKILLS

- | | |
|------------------------------|-------------------------|
| • Teamwork and collaboration | • Algorithms |
| • Cyber security | • Debugging |
| • C++ | • Java |
| • Python | • Front-end development |
| • Javascript | • HTML |
| • CSS | • Problem-solving |

CERTIFICATIONS

- | | |
|---|---|
| • Flutter and Dart: Developing iOS, Android, and Mobile Apps | • Generative AI Engineering with LLMs Specialization (IBM) |
| • Fundamentals of AI Agents Using RAG and LangChain | • Generative AI Advance Fine-Tuning for LLMs |
| • Generative AI Engineering and Fine-Tuning Transformers | • Generative AI Language Modeling with Transformers |
| • Gen AI Foundational Models for NLP & Language Understanding | • Generative AI and LLMs: Architecture and Data Preparation |
| • Project: Generative AI Applications with RAG and LangChain | |
